BOXER
PACKAGED SOLUTIONS

AIR HANDLING MADE SIMPLE

FOR THE COMPLETE VENTILATION SOLUTION

AT THE FOREFRONT OF PACKAGED SOLUTIONS FOR OVER 20 YEARS

Nuaire has been at the forefront of packaged AHU's for over 20 years, designing and manufacturing market leading ranges.

When launched in 2000, Ecosmart Boxer revolutionised the industry by providing the best solution for performance and energy efficiency, then enhanced it with the Ecosmart 'plug and play' control.

Fast forward sixteen years and the **New Boxer Packaged Solution (BPS)** has been designed, engineered and tested to provide **the most efficient, best performing, most compact and easiest to select AHU on the market.**

BPS can be supplied in many configurations to suit the project or application and is **available with either a high efficiency plate HX (ErP 2018) or thermal wheel (ErP 2018).** BPS also has options for recirculation, heating and cooling upon request.

BPS offers full control flexibility and is complimented with the new Ecosmart Control Platform of Ecosmart Classic, Connect or Adapt (with Trend).

All packaged controls are inbuilt and factory tested by Nuaire.

BPS BOXER PACKAGED SOLUTIONS - CLASSIFICATION FEATURES

BS EN 1886:2007 "Ventilation for buildings — Air handling units — Mechanical performance" sets out the measurement and classification standard for AHUs.

The key criteria are:

- Air leakage [L]
- Thermal bridging [TB]
- Mechanical strength or deflection [D]
- Thermal transmittance [T]

All of these are measured and rated against tabulated values to give a grade, 1 being the highest in each classification.

L1 CASING AIR LEAKAGE CLASS [L]

Our construction has passed positive and negative pressure tests, confirming L1 classification. L1 means that the unit shall not leak more than 0.22 l/s per m² of outer face area of positive pressure section and 0.15 l/s per m² of outer face area of negative pressure section, under test conditions. BPS has a classification of L1.

CASING AIR LEAKAGE @ -400 Pa

Class	Max leakage rate (f_{700}) (l/s·m ²)	Filter Class (EN 779)
L3	1.32	G1 to F7
L2	0.44	F8 to F9
L1	0.15	Superior to F9

EN 1886 - Casing Air Leakage Classifications at Negative Pressure

CASING AIR LEAKAGE @ +700 Pa

Class	Max leakage rate (f_{400}) (l/s·m ²)	Filter Class (EN 779)
L3	1.9	G1 to F7
L2	0.63	F8 to F9
L1	0.22	Superior to F9

EN 1886 - Casing Air Leakage Classifications at Positive Pressure

TB1 THERMAL BRIDGING OF CASING CLASS [TB]

A high thermal bridging factor is achieved by separation of the conductive metallic internal and external surfaces, with an insulating material. This will provide a unit with the lowest 'condensation forming potential' and minimise the damage/hazards this may cause.

BPS has a classification of TB1.

EN 1886 - Thermal Bridge - Classification Diagram

THERMAL BRIDGING FACTOR

Class	Thermal Bridging Factor (k_b)
TB1	$0.75 < k_b < 1$
TB2	$0.6 < k_b \leq 0.75$
TB3	$0.45 < k_b \leq 0.6$
TB4	$0.3 < k_b \leq 0.45$
TB5	No requirements

EN 1886 - Thermal Bridge - Classifications

D1 MECHANICAL STRENGTH OF CASING DEFLECTION [D]

The case strength of an AHU is important for product safety and longevity. If the case were unable to withstand the stresses applied to it in normal operation, air would eventually leak out, water may leak in, the unit aesthetic would suffer and damage may lead to malfunction or injury. D1 means the case shall not deflect more than 4mm per meter under test conditions. BPS has a classification of D1.

EN 1886 - Casing Strength - Classification Diagram

CASING STRENGTH

Class	Maximum relative deflection (mm x m ⁻¹)
D3	Exceeding 10
D2	10
D1	4

EN 1886 - Casing Strength - Classification Table

T2 THERMAL TRANSMITTANCE [T]

Minimising heat loss (or unwanted gain) requires insulation within panels and ductwork etc.

Insulation choice is a balance of thermal transmittance, sound absorption, weight, cost and ease of manufacture. Thermal transmittance is rated as a 'U value' of W/m²/K and we have achieved T2 where this U value is below 1. BPS has a classification of T2.

EN 1886 - Thermal Transmittance - Classification Diagram

THERMAL TRANSMITTANCE

Class	Thermal Transmittance (U) (W x m ⁻² x K ⁻¹)
T1	$U < 0.5$
T2	$0.5 < U \leq 1$
T3	$1 < U \leq 1.4$
T4	$1.4 < U \leq 2$
T5	No requirements

EN 1886 - Thermal Transmittance - Classifications

BPS BOXER PACKAGED SOLUTIONS - COMPLYING WITH BUILDING REGULATIONS

The following information is relevant to the selection of fans for Ventilation Systems, indicating the maximum specific fan powers allowed under Part L (Refer to the Non-domestic Building Services Compliance Guide: 2013 Edition for further details).

The SFP for the entire system (including both supply & extract fans) shall be less than that allowed by these figures. The following tables are the maximum values allowed under Building Regulations when finally commissioned.

Air distribution system	Specific fan power (W/(l/s))	
	New Buildings	Existing Buildings
Central balanced mechanical ventilation system with heating and cooling	1.6	2.2
Central balanced mechanical ventilation system with heating only	1.5	1.8
All other central balanced mechanical ventilation systems	1.1	1.6
Zonal supply system where the fan is remote from the zone, such as ceiling void or roof mounted units	1.1	1.4
Zonal extract system where fan is remote from zone	0.5	0.5
Zonal supply and extract ventilation system such as ceiling void or roof units serving a single room or zone with heating and heat recovery	1.9	1.9
Local balanced supply and extract ventilation system such as wall / roof units serving a single area with heat recovery	1.6	1.6
Local supply or extract ventilation units such as window / wall / roof units serving a single area (e.g. toilet extract)	0.3	0.4
Other local ventilation supply or extract units	0.5	0.5
Fan assisted terminal (VAV) unit	1.1	1.1
Fan coil units (rating weighted average*)	0.5	0.5
Kitchen extract, fan remote from zone with grease filter	1.0	1.0

*Note: The weighted average is calculated by the following formula:

$$\frac{P_{\text{mains},1} \cdot \text{SFP}_1 + P_{\text{mains},2} \cdot \text{SFP}_2 + P_{\text{mains},3} \cdot \text{SFP}_3 + \dots}{P_{\text{mains},1} + P_{\text{mains},2} + P_{\text{mains},3} + \dots}$$

where P_{mains} is useful power supplied from the mains in W

Extending SFP for additional components in new and existing buildings

Component	(SFP (W/(l/s)))
Additional return filter for heat recovery	+0.1
HEPA filter	+1.0
Heat recovery - thermal wheel system	+0.3
Heat recovery - other systems	+0.3
Humidifier / dehumidifier (air conditioning system)	+0.1

Example: For a central mechanical ventilation system with heating and cooling, and heat recovery via a plate heat exchanger plus return filter:

$$\text{SFP} = 1.6 + 0.3 + 0.1 \text{ W/(l/s)} \\ = 2.0 \text{ W/(l/s)}$$

Recommended minimum dry heat recovery efficiency for heat exchangers in new and existing buildings

Heat exchanger type	Dry Heat recovery efficiency
Plate heat exchanger	50%
Heat pipes	60%
Thermal wheel	65%
Run around coil	45%

SECTION 6 (2015 EDITION)

Permissible maximum specific fan power and pressure drop in air distribution systems.

Maximum specific fan powers in air distribution systems new and existing buildings.

System type	Specific fan power (W/(l/s))	
	New Buildings	Existing Buildings
Central balanced mechanical ventilation system with heating and cooling	1.6	2.2
Central balanced mechanical ventilation system with heating only	1.5	1.8
All other central balanced mechanical ventilation systems	1.1	1.6
Zonal supply system where fan is remote from the zone, such as ceiling void or roof mounted units	1.1	1.4
Zonal extract system where fan is remote from zone	0.5	0.5
Zonal supply and extract ventilation units, such as ceiling void or roof units serving single room or zone with heating and heat recovery	1.9	1.9
Local balanced supply and extract ventilation system such as wall/ roof units serving single area with heat recovery	1.6	1.6
Local supply or extract ventilation units such as window/ wall/ roof units serving single area (e.g. toilet extract)	0.3	0.4
Other local ventilation supply or extract units	0.5	0.5
Fan assisted terminal VAV unit	1.1	1.1
Fan coil unit (rating weighted average*)	0.5	0.5
Kitchen extract, fan remote from zone with grease filter	1.0	1.0

*The weighted average is calculated by the following formula:

$$\frac{P_{\text{mains},1} \times \text{SFP}_1 + P_{\text{mains},2} \times \text{SFP}_2 + P_{\text{mains},3} \times \text{SFP}_3 + \dots}{P_{\text{mains},1} + P_{\text{mains},2} + P_{\text{mains},3} + \dots}$$

where P_{mains} is useful power supplied from the mains in W

Extending SFP for additional components in new and existing buildings

Component	SFP (W/(l/s))
Additional return filter for heat recovery	+0.1
HEPA filter	+1.0
Heat recovery – thermal wheel system	+0.3
Heat recovery – other systems	+0.3
Humidifier/ dehumidifier (air conditioning system)	+0.1

Recommended minimum dry heat recovery efficiency for heat exchangers in new and existing buildings

Heat exchanger type	Dry heat recovery efficiency
Plate heat exchanger	50%
Heat pipes	60%
Thermal wheel	65%
Run around coil	45%

BPS BOXER PACKAGED SOLUTIONS - EXTERNAL FEATURES AND BENEFITS

BOXER PACKAGED SOLUTIONS

■ ONE PIECE PACKAGED SOLUTION

The BPS unit is a pre-selected catalogue range which is manufactured in sections for ease of manoeuvring on site. Unit modules may be clamped together on site using the pre-fitted 3D Intelli-clamp links.

■ WEATHERPROOFED AS STANDARD

BPS unit & ancillary modules are weatherproof as standard. All sections and modules have a flat roof which has a hydrophobic coating aiding water run off.

■ UNIQUE CONSTRUCTION

BPS has a unique construction which is a 'Patented applied' for design incorporating a thermally broken extrusion with fixed panels sandwiched together removing the requirement for any additional silicon sealant to be added on site. This super strong construction meets class D1 (Deflection) see page 4 for details.

■ LOW NOISE SOURCE

50mm Double skinned panels ensure low noise levels. Optional, additional attenuators are available to provide a continuous acoustic solution.

■ ALUZINC FINISH

BPS is manufactured from corrosion resistant Aluzinc. Aluzinc can last 5 times longer than galvanised steel.

■ INTEGRAL BASE FRAME

The structural base frame is raised for additional support and includes slots for fork lift arms for easy manoeuvring on site.

The base frame is powder coated in Nuair blue.

■ PORT HOLES/LIGHTS AND CABLE GLANDS

BPS unit is supplied with port holes and internal lights on all fan sections. Each unit has 5 cable glands as standard.

■ HINGED OR REMOVABLE ACCESS PANELS

All hinged access panels will be lockable and removable via locked hinges which can be opened for panel removal. All keys are identical and will open any handle or hinge.

The hinges do not need to be unlocked in normal operation of opening and closing.

■ OPTIONAL CONDENSER UNIT/ MATCHING FRAME

The BPS unit is available with a range of heating and cooling coils including a reverse cycle DX coil with matching condenser. The standard condenser is Mitsubishi Mr Slim which is supplied loose for integration on site (by others).

If a condenser is ordered* two pre-wired PAC controllers are installed on the internal control panel of the BPS unit (only available with Ecosmart Connect or Adapt control).

Condensing units are supplied with base frames. Painted Condensers are available for coastal environments.

*Refer to page 72 for further details.

■ ISOLATOR AS STANDARD

An IP66/67 lockable isolator is fitted on all models.

■ OPTIONAL EXTERNAL ANCILLARIES

Wide range of optional ancillaries including modular support frame, weather terminals, dampers, silencers, recirculation modules, heating & cooling options.

■ 5 YEAR WARRANTY

BPS with Ecosmart Classic, Connect or Adapt controls have a 5 year warranty.

Mitsubishi Condensing units when supplied with BPS and PAC control have a 3 year warranty, see page 72 for details. Contact Nuair for further details.

■ BPS UNITS ARE AVAILABLE WITH MITSUBISHI MR SLIM CONDENSERS (SEE PAGE 72 FOR DETAILS)

▲ Model shown: Vertical Plate Heat Exchanger Unit.

■ ONE PIECE PACKAGED SOLUTION. VERTICAL & HORIZONTAL UNITS EASILY SPLIT INTO THREE OR FOUR SECTIONS

■ UNIQUE CONSTRUCTION DESIGN, (PATENT APPLIED) NO REQUIREMENT FOR ADDED SILICONE

■ CODING **B 8 15 H / L R / CO - L**

8. Handing:	L = Left, R = Right

* Condenser Unit and control by others.
 **Ecosmart Connect & Adapt models only.

◀ Model shown: Horizontal Plate Heat Exchanger Unit.

■ OPTIONAL MODULAR SUPPORT FRAMES

■ HINGED OR REMOVABLE ACCESS PANELS

■ INTEGRAL BASE FRAME WITH SLOTS FOR FORK LIFT

BPS BOXER PACKAGED SOLUTIONS - INTERNAL FEATURES AND BENEFITS

■ HIGHLY ENERGY EFFICIENT HEAT EXCHANGER

BPS is available with either a plate or thermal wheel heat exchanger.

Thermal Wheels are ErP 2018 compliant.

As standard there is a purge sector and bypass provided by interrupting the wheel rotation.

The plate HX is 2018 ErP compliant. (See technical information). The heat exchanger has coefficients of up to 94%+.

■ ENERGY SAVING EC MOTOR TECHNOLOGY

BPS has performance optimised backward curved impellers and IP54 EC motors which provide low specific fan powers.

■ EASILY REMOVABLE BLOWERS FOR QUICK & EASY MAINTENANCE

Blowers are mounted on self-supporting frame.

For ease of maintenance the frame can be removed through a lifted off access panel.

■ RE-CIRCULATING OPTION

Recirculation is provided within an ancillary module which houses a mixing damper.

The operation will be open/close.

The system will allow recirculation only when called for in the standard control strategy of Ecosmart Connect or Adapt.

■ ELECTRIC HEATER

The electric heater module is separate from the main packaged unit. Finned air-heater elements provide the most efficient method with lower surface temperature operation which also prevent 'burnt dust' odours.

■ INTERCHANGEABLE COILS

BPS has a wide range of coil options. All coils are mounted on a common drain tray and slide assembly allowing them to be interchangeable without any modification to the unit. Two coils can be fitted into the unit at one time.

■ LPHW HEATER

The LPHW* coil is housed within the unit and is interchangeable with other 'wet' coil options.

*LPHW frost protection ancillary is also available.

■ CHILLED WATER COOLING

The chilled* water coil is housed within the unit and is interchangeable with other 'wet' coil options. *LPHW & Chilled water coils will not have valve & actuator assemblies fitted as standard. These are optional ancillaries, contact Nuair. (2 and 3 port valve options available).

■ DIRECT EXPANSION (DX)

All DX coils used in BPS are suitable for reverse cycle, capable of providing heating and cooling. Our DX reverse cycle packages within Ecosmart Connect and Adapt options come with a matched Mitsubishi Condenser, supplied loose for integration by others.

A coil-only option is available upon request, where a 0-10V demand signal may be utilised by others to control the external refrigerant system (not supplied).

■ CONDENSATE TRAY WITH BUILT IN PUMP

A condensate pump is fitted as standard (on Plate HX units and Thermal Wheel HX units with Cooling) and incorporates an alarm* function.

The pump has a capacity of 50l/hr with 20m (six storeys) of head pressure available. All drains within the unit (for coils and heat exchanger) will be fitted with a vacuum-formed plastic corner allowing lowest point and gravity flow for drain away. *If the alarm is triggered the unit will automatically be placed in bypass mode minimising further condensate production. Unit operation will otherwise be unaffected.

■ FROST PROTECTION

The plug and play frost protection modules (Electric & LPHW) are stand alone, designed to protect the unit internals from low-temperature damage.

■ BYPASS AS STANDARD

In order to avoid unnecessary heating of the outdoor air in the summer, the bypass damper can be opened. With this damper setting a night cooling can be performed using the control system (Ecosmart Connect & Adapt models only).

The cool outdoor air is then blown directly into the room past the heat exchanger at night.

■ INTERCHANGEABLE FILTERS

Standard filter arrangement will include M5 filters in the extract section and a combination of G4 pre-filter and F7 bag filter within the supply air stream. For other filter options contact Nuair.

■ CONSTANT PRESSURE CONTROL AS STANDARD

Improve energy performance of a building using a centralised ventilation system, and guarantees lower energy costs for the end user (Applies to Connect and Adapt models only).

■ NEW BUILT IN ECOSMART CLASSIC, CONNECT OR ADAPT (TREND) CONTROL OPTIONS

Energy efficient demand control ventilation solution utilising the very latest efficient Ecosmart control platform options:

Ecosmart Classic control was the first plug and play control on the market and has been a Nuair core product for the last 13 years. Classic provides 0-10V BMS interface, trickle and boost as standard.

Ecosmart Connect demand based control option delivers network connectivity and advanced functionality. Full BMS integration via Bacnet MS/TP (by others). Connect can be expanded to Bacnet IP with a separate optional router.

Ecosmart Adapt is designed to meet site/project requirements – Ecosmart Adapt with Trend IQ4E with 8DO expansion module and full Bacnet IP integration (by others). Trend is the current standard option however, other control types such as Cylon, Siemens or Schneider can be incorporated, contact Nuair for details.

Ecosmart Classic, Connect & Adapt are available with a wide range of sensors & enablers.

All control panels are internally fitted and have a 5 year warranty.

Note: Basic control model also available, contact Nuair for details.

■ INTERCHANGEABLE FILTERS WHICH EASILY SLIDE IN AND OUT

■ EASILY REMOVABLE BLOWERS FOR QUICK & EASY MAINTENANCE

■ HIGHLY ENERGY EFFICIENT PLATE HEAT EXCHANGER (THERMAL WHEEL - VERTICAL UNITS ONLY)

▲ Model shown: Horizontal Plate Heat Exchanger Unit.

▼ Model shown: Vertical Thermal Wheel Unit.

■ OPTIONAL BUILT-IN ECOSMART CLASSIC, CONNECT OR ADAPT CONTROL (Connect Control shown with PAC controller).

BPS DIMENSIONS FOR VERTICAL PLATE HEAT EXCHANGER UNIT (mm)

▲ Model shown is right hand.

Plate Heat Exchanger Unit		A	A*	B	C
Plate HX	07	3150	3600	1330	1492
Plate HX	12	3355	3805	1530	1695
Plate HX	17	3540	3990	1750	1900
Plate HX	22	3950	4400	2030	2195
Plate HX	32	4230	4780	2330	2498
Plate HX	42	4950	5500	2730	2898

*Electric Heater is included.
Dimension 'A' is for LPHW or No heating.

BPS DIMENSIONS FOR VERTICAL THERMAL WHEEL UNIT (mm)

▲ Model shown is right hand.

Thermal Wheel Unit		A	A*	B	C
Thermal Wheel	07	2700	3150	1330	1492
Thermal Wheel	12	2700	3150	1530	1695
Thermal Wheel	17	2700	3150	1750	1900
Thermal Wheel	22	2800	3250	2030	2195
Thermal Wheel	32	3100	3650	2330	2498
Thermal Wheel	42	3100	3650	2730	2898

*Electric Heater is included.
Dimension 'A' is for LPHW or No heating.

BPS BOXER PACKAGED SOLUTIONS - VERTICAL UNIT - ANCILLARY OPTIONS (Based on right hand version)

INDIVIDUAL BPS ATTENUATOR DUCTING FLANGE DIMENSIONS (mm), WEIGHTS (kg)							
Part Number	Description	D. Width	E. Height	F. Depth	G. Depth	Weight (kg)	
B07V/AF	BPS size 07 attenuator flange for vertical PHX or Thermal wheel. One required per attenuator	1212	582	204	53	17	Accommodates 950x400mm internal 30mm Mez.
B12V/AF	BPS size 12 attenuator flange for vertical PHX or Thermal wheel. One required per attenuator	1412	682	204	53	20	Accommodates 1100 x 500mm internal 30mm Mez.
B17V/AF	BPS size 17 attenuator flange for vertical PHX or Thermal wheel. One required per attenuator	1632	792	204	53	24	Accommodates 1300 x 600mm internal 30mm Mez.
B22V/AF	BPS size 22 attenuator flange for vertical PHX or Thermal wheel. One required per attenuator	1912	932	204	53	29	Accommodates 1600 x 750mm internal 30mm Mez.
B32V/AF	BPS size 32 attenuator flange for vertical PHX or Thermal wheel. One required per attenuator	2212	1082	204	53	38	Accommodates 1900 x 850 mm internal 30mm Mez.
B42V/AF	BPS size 42 attenuator flange for vertical PHX or Thermal wheel. One required per attenuator	2612	1282	204	53	44	Accommodates 2300 x 1050mm internal 30mm Mez.

BPS BOXER PACKAGED SOLUTIONS - FULLY INTEGRATED REVERSE CYCLE DX WITH CONTROL PAC

BPS UNITS ARE AVAILABLE WITH MITSUBISHI MR SLIM CONDENSERS KEY FEATURES:

Condensing units are supplied with base frames. (for use with Ecosmart Connect or Adapt control)

Built in Ecosmart Connect or Adapt control. (Below with PAC controller)

- Simpler installation due to BPS unit with Reverse cycle DX coil and Mr Slim condensers being a single source of heating and cooling.
- BEMS external monitoring and control can be achieved through direct Modbus, digital switches or analogue input.
- Anti-cycling measures incorporated into the design to extend the life of the outdoor units.
- Mr Slim Condensers are supplied loose for integration on site by others.
- Condensers are only available with Ecosmart Connect or Ecosmart Adapt controlled BPS units. PAC controllers are supplied built into unit.

- Mr Slim Condensers are supplied with a 3 year Warranty (The 3 year warranty of the Mitsubishi Electric Equipment as supplied by Nuairé will be held by Nuairé & Kooltech Ltd).
- The installation should be carried out by either a Mitsubishi Accredited installer, business solution partner or Diamond partner. If the above is not adhered to, the stated warranty will be void and all equipment will only have a 12 month defect warranty subject to terms and conditions. For details contact Nuairé.
- BPS with fully integrated reverse cycle DX and PAC control provides a complete system.

DIMENSIONS (mm) CONDENSER/FRAME

BPS BOXER PACKAGED SOLUTIONS - CONSULTANTS SPECIFICATION

OPERATION

The packaged supply and extract unit shall be manufactured from Aluzinc corrosion resistant steel, with 50mm double skinned panels and anodized aluminium frame. All external fittings and fixings shall be stainless steel, aluminium or non-metallic. All panels and frames will be of a totally thermally-broken design, complying with the following specification in accordance with BS EN 1886: Mechanical strength, D1; Leakage class, L1; Thermal transmittance, T2; Thermal bridging, TB1. Panels and frames will be sealed without the use of silicon, mastic or other liquid gasket.

The unit shall include the following items: -

Plate HX:

A high efficiency, ERP compliant heat exchanger with automatic bypass and power saving partial bypass, complete with a condensate tray and pump offering 20m of head pressure. G4 pre-filter and F7 main supply filters shall be fitted with a single M5 bank present on the extract side. Slides for alternative panel and bag options shall be present and pressure drop monitoring for maintenance notification will be included.

Thermal Wheel HX:

A high efficiency, ERP compliant heat exchanger with automatic bypass, complete with a condensate tray and pump (where cooling is fitted) offering 20m of head pressure. G4 pre-filter and F7 main supply filters shall be fitted with a single M5 bank present on the extract side. Slides for alternative panel and bag options shall be present and pressure drop monitoring for maintenance notification will be included.

Performance optimised backward curved impellers and IP54 EC motors shall be used to provide low specific fan powers and stepless speed control without tonal noise generation. Fan pressure transducers shall be fitted (ES Connect & Adapt only) for constant pressure/flow control and energy monitoring. Internal lighting and inspection portholes shall be present on all fan modules.

All hinged access panels shall be lockable and removable (with a common key for all) allowing full maintenance access from the side. The unit has left (and right option) hand arrangement in direction of supply air flow.

- A LPHW heater battery shall be fitted (on LPHW units).
- An electric heater module shall be present (on Electric heater units), complete with power controller to allow output modulation from the unit control.
- A fail-safe auto-reset safety device shall be present.
- A chilled water cooling coil shall be fitted (on chilled water units).

A reverse cycle DX coil shall be fitted (on DX-R units), with 5 psi oxygen free nitrogen (OFN) holding charge. The coil is sized to suit the accompanying PUHZ-P140 Mitsubishi condensing unit(s) (including baseframes) with preconfigured Mitsubishi PAC control interface(s) and sensors pre-fitted to the main unit.

Structural baseframes shall be fitted, powder coated with covered forklift slots and 50mm square lifting bar holes for site manoeuvrability. Three axis alignment clamps shall be fitted externally.

All modules and ancillaries shall be individual weatherproofed with nanotech hydrophobic roofing, providing unparalleled corrosion resistance and aesthetic longevity.

An IP66/67 lockable isolator shall be present for power connection on main and electric heater modules. Sealing grommets will be present for control cable access to the unit internals without the need for drilling on site. Module electrical interconnection shall be made using pre-fitted plug and socket arrangements.

Modules shall be provided with identification labelling to aid assembly and QR coded badges to simplify document retrieval via portable devices.

Autodesk REVIT files shall be provided for Building Information Modelling and all units shall be based on performance testing carried out within an AMCA certified test laboratory.

**Ecosmart Connect & Adapt models only.

BPS BOXER PACKAGED SOLUTIONS - CONTROL OPTIONS CONSULTANTS SPECIFICATION

ECOSMART CLASSIC OPTION - DEMAND CONTROLLED VENTILATION

Provides the facility for energy saving via an intelligent stand-alone AHU function with local diagnostic status indication, or allows convenient integration with the client BMS with a minimal co-ordination requirement.

The factory fitted Ecosmart Classic control includes:- integral infinitely variable speed / duty control for the supply and extract fans, with independent minimum, maximum and offset adjustment for accurate commissioning. The control assembly is mounted internally. The control features a run on timer and "background" ventilation function, and is provided with unit status indication, run and fail relays and interface connections for Ecosmart Classic sensors/enablers and system dampers.

The heat exchanger bypass is automatically operated according to temperature and a pre-defined strategy.

***The heating output (LPHW or electric) is automatically regulated to control the Air - Off condition.

The Ecosmart control module can additionally be connected to provide the following integrated BMS interfaces.

- 0 - 10 volt inputs. This will enable the following functions:- Switch the unit ON/OFF. Variable speed / duty control, Switch from low speed to high speed, Enable heating/cooling.
- 2 No. Volt free contacts give fan run and failure unit status indication.

Units fitted with Ecosmart Classic control have a 5 year warranty.

ECOSMART CONNECT OPTION – ENHANCED DEMAND CONTROLLED VENTILATION

A comprehensive unit control specification - The control assembly is mounted internally, factory fitted and tested to provide guaranteed operation from a single supplier – one who will take responsibility.

The unit integrated Ecosmart Connect system provides the facility for operational efficiency and energy saving by allowing a comprehensive range of unitary control functions and / or full BMS integration (by others) via standard BACnet (MS/TP). The system incorporates a web access enabled controller, and is augmented by application specific unit interface and diagnostic circuits.

Controller software is optimised and pre-configured, and each unit / control assembly is fully functionally tested at works (Refer to technical documentation for full controller functional specification).

Units fitted with Ecosmart Connect control have a 5 year warranty.

ECOSMART ADAPT WITH TREND OPTION – ENHANCED DEMAND CONTROLLED VENTILATION

A comprehensive unit control specification - The control assembly is mounted internally, factory fitted and tested to provide guaranteed operation from a single supplier – one who will take responsibility. The unit integrated Ecosmart Adapt system provides the facility for operational efficiency and energy saving by allowing a comprehensive range of unitary control functions and / or full BMS integration (by others) via standard BACnet IP configuration.

The system incorporates a web access enabled Trend IQ4E with 8DO expansion module controller, and is augmented by application specific unit interface and diagnostic circuits. Controller software is optimised and pre-configured, and each unit / control assembly is fully functionally tested at works.

(Refer to technical documentation for full controller functional specification).

Units fitted with Ecosmart Adapt control have a 5 year warranty.

(Refer to 'Description of control' for further details).

The unit shall be manufactured by Nuair.

Note: The Reverse Cycle DX coil/Condenser can only be used with Ecosmart Connect or Adapt Control options.

The Mitsubishi condenser has a 3 year warranty.

Constant Pressure Control is standard on both Ecosmart Connect & Adapt Control options.

For Basic control option contact Nuair.

BPS BOXER PACKAGED SOLUTIONS - ECOSMART CONTROL PLATFORM - IT'S SO SMART IT'S SIMPLE

DEMAND VENTILATION SOLUTIONS – DESIGNED FOR EFFICIENCY AND PERFORMANCE

Nuair have a pedigree for designing and manufacturing energy efficient ventilation equipment and matched control systems. Our very first control was produced in the late 1980's.

Nuair was the first ventilation manufacturer to introduce low voltage energy saving control systems. Its fans with 'Ecosmart' technology varied the ventilation rate to suit occupant levels. Ecosmart was launched in 2002 and was revolutionary within the industry by providing the first "plug and play" control system.

Nuair continues to lead in the industry with the expansion of their Ecosmart Controls Platform.

Energy efficient demand based control fitted with Trend IQ4E with 8DO expansion module controller. Allows for unitary control and full BMS integration via BACnet IP (by others). The control strategy supplied. Fully controls our unit in stand-alone mode, however it can be connected to a BMS and changed by others if required. **Ecosmart Adapt with Trend has a 5 year warranty.** For other options of Ecosmart Adapt contact Nuair.

NEW Energy efficient demand based control providing a network connectivity and advanced functionality. Full BMS integration via BACnet (MS/TP). (Upgrade to IP network available). **Ecosmart Connect has a 5 year warranty.**

UK's leading Energy Efficient 'plug and play' solution for over 20 years. Provided with BMS interface, trickle and boost as standard. **Ecosmart Classic has a 5 year warranty.**

THE MOST SUCCESSFUL ENERGY CONTROL EVER - DEMAND VENTILATION AT YOUR FINGER TIPS

BASIC CONTROL

For details on Basic control contact Nuair.

ECOSMART ADAPT

TREND IQ4E WITH 8DO EXPANSION MODULE INSIDE WITH FULL BMS INTEGRATION VIA BACNET.

"The management and control of modern buildings grow ever more sophisticated. A Building Energy Management system (BEMS) must be tailored to suit each customer's specific control requirements. It must provide efficient HVAC control, coupled with the flexibility to accommodate changes in occupancy status and staff relocation at short notice; whilst simultaneously delivering improved comfort conditions. A BEMS must also provide real time management information and control, enabling customers to achieve significant energy savings". (TREND)

Ecosmart Adapt with Trend provides control of the ventilation including the heating, or cooling allowing unitary control and full BMS integration via BACnet IP. The Ecosmart Adapt with Trend control system includes an IQ4E controller which is pre-configured and the unit and control assembly is functionally tested at Nuair before customer delivery.

REDUCED INSTALLATION & ON-SITE COMMISSIONING TIME ON NEW & RETROFIT PROJECTS -

Advanced tools within the control automate many tasks, simple to use displays minimise data input, whilst reducing commissioning time and potential human error.

- **Ease of use** - Using Ecosmart Adapt with Trend will deliver substantial savings on utility costs.
- **Peace of mind** - Ecosmart Adapt with Trend has a 5 year warranty.

ECOSMART CONNECT

Ecosmart Connect provides control of the ventilation including the heating, or cooling allowing unitary control and full BMS integration via BACnet (MS/TP). (Upgrade to IP network available).

The Ecosmart Connect controller is pre-configured and the unit and control assembly is functionally tested at Nuair before customer delivery.

REDUCED INSTALLATION & ON-SITE COMMISSIONING TIME ON NEW & RETROFIT PROJECTS -

Advanced tools within the control automate many tasks, simple to use displays minimise data input, whilst reducing commissioning time and potential human error.

- **Ease of use** - Using Ecosmart Connect will deliver substantial savings on utility costs.
- **Peace of mind** - Ecosmart Connect has a 5 year warranty.

ECOSMART CLASSIC

Varying the ventilation rate in a building to suit changing occupant levels used to be an expensive option – Ecosmart brings this within everyone's pocket. Minimising energy losses through re-heating the air replaced through ventilation is at the top of the agenda; building regulations make this a necessity.

Ecosmart not only saves energy and carbon emissions it prolongs the life of the heat recovery unit.

Choosing Ecosmart is your reliable option, used by design engineers for many years and is now an integral feature of most Nuair fans and AHU's.

- **Saves time on site** - Ecosmart controls are all pre-assembled, configured and installed directly into the units.
- **Simpler system** - No need for VCD (directly on the fan) no wasted energy or noise generation because air volume can be precisely set via integrated speed control.
- **Simple & precise commissioning** - As recommended in Part L, Ecosmart enables the system to be accurately commissioned via integrated speed control.

If the unit is controlled by 0-10V BMS the system responds to a 0-10V dc BMS signal – refer to Manufacturers I&M for detail.

BPS BOXER PACKAGED SOLUTIONS - ECOSMART CONTROL PLATFORM - IT'S SO SMART IT'S SIMPLE

ecosmart classic SENSORS & ENABLERS

All Ecosmart Classic Systems must include at least one enabler.
(N.B. when used, BMS control and time clocks take over all other enablers).

ES-PIR2 (Enabler)

Detects movement and activates system. Incorporates a system status LED, overrun timer and timer adjustment.

ES-TEMP2 TEMPERATURE (Sensor)

Modulate fan speed based on room temperature. Incorporates two system status LEDs. (Green = OK, Red = Failure) and temperature set point level adjustment.

ES-THERMOSTAT2 (Enabler)

Activates the system when the temperature is above set point. Incorporates two system status LEDs. (Green = OK, Red = Failure) and temperature set point level adjustment.

ES-RH2 RELATIVE HUMIDITY (Sensor)

Modulate fan speed based on RH level. Incorporates two system status LEDs. (Green = OK, Red = Failure) and RH set point level adjustment.

ES-AVI2 (Enabler)

When fan failure occurs the AVI will flash a warning. Supplied with pre-plugged 10m length of communication cable.

ES-CI SEMI-AUTOMATIC USER CONTROL

Fan, heating & cooling selected by external volt free switch, speed selected by 0-10V signal.

ES-HUMIDISTAT2 (Enabler)

Activates the system when the RH level is above set point. Incorporates two system status LEDs. (Green = OK, Red = Failure) and RH set point level adjustment.

ES-JB JUNCTION BOX

Designed to be compatible with Ecosmart System this unit is supplied with a pre-plugged 10 metre length of communications cable and has 8 further ports.

ES-CO2RM (Sensor) ES-CO2RMPP (Sensor)

Surface mounted room carbon dioxide (CO₂) sensors incorporate a temperature sensor. RM = SELV option, RMPP complete with SELV AC powers supply.

ES-CO2 (Sensor)

Duct mounted sensor to modulate fan speed based on CO₂ levels. Connect to fan directly. Pre-wired with 2m cable (not adjustable).

ES-HTCSIG (Enabler)

Signal conditioning circuit for humidity, temperature and CO₂ sensors.

SWITCHED LIVE (by others)

Any mains voltage signal connected to the switched live terminal (S/L) in the unit. This affects the connected fan only.

ecosmart ROOM MODULES CONNECT

ESCO-TPL

Ecosmart Connect Room Module - Temperature and PIR.

ESCO-THS

Ecosmart Connect Room Module - Temperature and Humidity.

ESCO-TDPL

Ecosmart Connect Room Module - Temperature, Display and PIR.

ESCO-TDHL

Ecosmart Connect Room Module - Temperature, Display and Humidity. (Displays either temperature or humidity).

ESCO-TDHS

Ecosmart Connect Room Module - Temperature, Display and Humidity. (Humidity is not displayed).

TOUCH SCREENS & MANUAL USER CONTROLS

ES-LCD (Enabler) Touch screen user control in white incorporating time clock facility. This can control the function of the fan by manual setting or using a set of timed programs.

ES-UCF Manual 'on' and 'off' system user/speed control. Incorporates two system status LEDs (Green = OK, Red = Failure).

ESCO-LCD Touch screen display.

The ESC-LCD is a user friendly operator interface featuring BACnet® communication and a colourful, graphic display with touch-screen interface. It is powered by 12-24VAC / VDC.

ESCO-TDS
Ecosmart Connect Room Module - Temperature and Display.

ESCO-TS
Ecosmart Connect Room Module - Temperature.

ESCO-CL
Ecosmart Connect Room Module - CO2.

ESCO-TDFS
Ecosmart Connect Room Module - Temperature, Display and Fan Speed Override.

ESCO-THPL
Ecosmart Connect Room Module - Temperature, Humidity and PIR.

ESCO-IPN
The BACnet IP to MS/TP Router exchanges information between networks and allows the controller to communicate on an IP network. One router is required for each MS/TP network.

THERMISTOR TEMPERATURE SENSORS

Code: TB/T1/S – For duct or immersion use. Short 150mm.
TB/T1/L – For duct use only. Long 400mm

Low cost thermistor sensors comprising insertion, clamp-on, and outside air versions. The insertion sensor may be used for duct or immersion purposes. It has a 6 mm diameter brass probe which is suitable for retrofit immersion applications and will fit most existing pockets (universal fitting kit option).

FEATURES

- Low cost
- High quality thermistors
- Brass probes
- M20 conduit entry with M16 cable gland
- IP67 housing
- Quarter turn quick release lid
- Easy to wire
- Universal kit option for retrofit of immersion sensors
- Adjustable insertion depth flange option for duct sensors

DUCT HUMIDITY & TEMPERATURE SENSORS

Code: HT/D – Duct and thermistor sensor (+/-3%).

Duct mounted relative humidity and temperature sensors for HVAC applications. The certified 2% high accuracy (±2%) and standard 3% versions offer excellent linearity and stability over a wide humidity range (10 to 90 %RH).

FEATURES

- Pre-calibrated for ease of commissioning
- IP65
- Operates over 10 to 100 %RH non-condensing
- ± 3% accuracy versions
- 2 part connectors for ease of installation
- Humidity sensor element protected by replaceable filter
- Capacitive humidity sensing element provides excellent long term stability
- Adjustable depth duct mounting flange option

CO2 SENSORS

Code: CO2/T/D – Duct sensor.
Code: CO2/T/S – Space carbon dioxide concentration and temperature sensor.

The CO2 duct and space sensors monitor the carbon dioxide concentration and temperature of the air. The space sensors have additional options of humidity monitoring and a 4 digit display. The display will show the measured values in succession. The duct sensor has a quick-release lid to facilitate installation.

FEATURES

- Low cost, high quality thermistor temperature sensor
- Humidity monitoring option for space sensor
- Optional digital display for space sensor
- IP67 housing (duct sensor)
- Quarter turn quick release lid (duct sensor)
- Two part terminals to facilitate wiring
- 24 Vac/dc supply
- Adjustable depth duct mounting flange option

IQVIEW4 Touch screen display, (6 x 4 inch). FPK/Plate – Mounting plate.
IQVIEW4/SM BOX – Surface mount box for wall or panel.
Transformer for IQVIEW4 included.
ACC/24V - 230/24 VAC, 36 VA

IQVIEW8 Touch screen display, (10 x 6 inch). IQVIEW8/SM BOX – Surface mount box for flat surfaces.
Transformer for IQVIEW8 included.
ACC/24V – 230/24 VAC, 36 VA

SDU Display. RD/SDU-IQ2COMMSCABLE/3m – RJ11 plug to RJ11 plug cable (3m) for SDU.
