

AC Variable Speed Drive

# PUMP CONTROL

Energy efficient pumping with OPTIFLOW

### AC Variable Speed Drive

0.75kW - 250kW / IHP - 350HP **200 - 600V** Single & 3 Phase Input

### **Energy Efficient Pumping**

When a pump or pump set is selected, it must be suitable for operation during periods of maximum flow demand. In many applications, this maximum flow level may be rarely required, and as such the pump may operate for long periods at less than maximum flow capacity. By varying the speed of the pump to match the actual flow demand, significant energy savings are possible.

Optidrive Eco Pump has been designed to maximise the energy savings potential in pumping applications, whilst also providing significant additional benefits in reduced installation costs, maintenance costs and downtime. Throughout all this, Invertek's "Ease of Use" philosophy ensures that advanced features are simple

to commission, without requiring extensive, in depth knowledge of a huge number of parameters. Optidrive Eco Pump has a simple menu structure, and provides just the right amount of parameters to allow flexibility without over complication.

Overall, this provides the perfect balance of Easy to Install, Easy to operate, Advanced Pump Control.

# Save Energy

**Eco vector operation**, based on Invertek's advanced motor control provides the most energy efficient operation of the pump, continually optimising the output to match the required flow with minimum energy consumption.

**Advanced sleep & wake functions** provide maximum energy savings by switching off the pump when not required

# Save Money

**OPTIFL** "" technology allows simple operation of multiple pump sets without the need for a PLC

**Pump blockage detection and cleaning** dramatically reduces pump maintenance requirements

**Built in PLC function** allows bespoke customised applications to be programmed directly in the drive

# Save Time

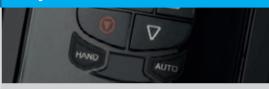

conditions change

**Simple parameter set** allows fast commissioning of pump control systems

Pump operating curve detection automatically detects and monitors normal pump behaviour and is able to react when pumping

**Customisable OLED display** provides excellent visibility of drive status and operation in all conditions

### **Key Features**

**ECO Vector Motor Control** 

**Standard Induction Motors** 

**Permanent Magnet AC Motors** 

**Brushless DC Motors** 

**Synchronous Reluctance Motors** 

**Energy Optimised Design** 

**Internal EMC Filter** 

**Low Noise Operation** 

### **Maximum Pumping Efficiency**

### Unique Eco Vector Sensorless Control

Optidrive Eco Pump uses advanced motor control technology, designed to provide the most energy efficient motor control possible. Operation with standard IM Motors, Permanent Magnet or Synchronous Reluctance motors is possible, all without requiring any feedback device or optional modules – simply change parameters to suit the connected motor, autotune and operate!

Eco Vector continuously adjusts in real time to provide the most efficient operating conditions for the load, typically reducing energy consumption by 2 – 3% compared to standard AC drives – providing similar long term costs savings to selecting a higher efficiency motor.

### **Energy Optimised Design**

Optidrive Eco Pump up to frame size 5 are designed with film capacitors, replacing the traditional electrolytic capacitors used in the DC link. Film capacitors have lower losses, and also remove the need for AC, DC or swinging chokes, improving overall drive efficiency. Efficiency is improved by up to 4% compared to standard AC drives, whilst also reducing supply current total harmonic distortion (iTHD), improving the Real Power Factor and reducing total input current, leading to cost savings on installation through reduced cable and fuse ratings and smaller supply transformer rating.

# **OPTIFL** Multi-pump Control

Embedded control technology for multi-pump systems

### **Total Control**

A single 'Master' drive acts to control and monitor system operation. Control connections are made to this drive only, saving installation time and reducing costs.

## **Simple Connection**

Additional drives connected on the system require a single RJ45 connection and basic commissioning, leading to time savings and simplified installation.

### **Flexible Solution**

The system can operate with up to five pumps in any configuration, e.g. Duty / Assist / Standby. Duty pumps are automatically rotated, ensuring maximum service life and system efficiency.

## Energy efficient pumping with **OPTIFL** W

### **Avoid Pump Downtime**

### Blockage Detect/Clear

Optidrive Eco Pump can detect pump blockages and trigger a programmed cleaning cycle to automatically clear them, preventing downtime.

#### **Dry Run Protection**

Optidrive Eco Pump can evaluate a pump's speed/power and shut it off or warn when the pump starts to run dry, protecting it from heat/friction damage.

#### **Motor Preheat Function**

Optidrive Eco Pump features a motor preheat function to help ensure moisture is not permitted to collect on the motor in periods of inactivity and prior to motor start up. In addition, the motor preheat function can be used to keep condensation from developing on the motor as the motor cools down immediately following a stop. The feature is fully configurable, meaning the pump can be always available the instant it is required.

### **Pump Stir Cycle**

Triggered by a settable period of inactivity, a configurable cleaning cycle can be run to clear sediment, ensuring the pump is ready to run when needed.

### Summary

- All drives operate at variable speed for maximum energy efficiency.
- Operating time (Hours Run) is automatically balanced and duty pumps rotated
- Automatic system reconfiguration in the event of a pump fault (including the master pump).
- Continued system operation when drives are individually powered off (including the master drive).
- Communication and +24V control voltage shared between drives via a standard RJ45 patch lead.
- Independent maintenance indicators for each pump.
- Any pump can be switched to Hand operation a the touch of a button, and will automatically rejoin the network when switched back to Auto.
- For waste water applications each pump can be set for blockage/ragging detection and activate an automatic de-ragging/pump cleaning cycle.
- Optional mains isolator with lock-off for safe pump maintenance.
- Optiflow function configured through simple parameter set-up and intelligent drive self configuration.

### **Consistent Flow**

The required pressure and flow levels are maintained regardless of how many pumps are required. When demand increases, additional pumps are automatically brought on stream to assist and are switched off again when not required.

### **Reduced Downtime**

In the event of a fault, or if a pump needs to be isolated for maintenance, the system will automatically continue to operate with the remaining available pumps. The mains power can even be completely isolated from the Master drive without affecting operation of the Slave drives.

# **Drive Features**

A compact and robust range of drives dedicated to pump control

Maintenance interval timer and service indication

Multi Language OLED Display

Hand / Auto Keypad

# Enclosure Options

Pluggable terminals

# OLED Display

### Installed as standard on all IP55 & IP66 models

- Clear multi-line text display
- Operates −10 to 50°C
- Wide viewing angle, effective in dark and light conditions
- Customisable display
- Multi-language selection

Long Life, Dual Ball Bearing Fans

Integrated cable management

## Energy efficient pumping with **OPTIFL**

### **Quiet Motor Operation**

High switching frequency selection (up to 32kHz) ensures motor noise is minimised.

### **Quiet System Mechanics**

Simple skip frequency selection avoids stresses and noise caused by mechanical resonance in pipework.

### **Quiet Drive Operation**

Temperature-controlled cooling fans ensure quiet operation in periods of reduced load.

### Noise Reduction through Speed Control

Optimising motor speed gives significant energy savings and reduces motor noise.

# Optidrive Eco Pump uses innovative design to improve overall efficiency whilst minimising the harmonic distortion levels. All drives designed for 3 phase power

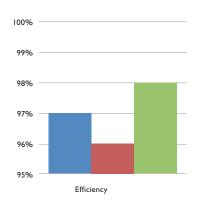

supply operation up to frame size 5 utilise film capacitor in the DC link, providing exceptionally low harmonic current distortion without compromising efficiency. Frame size 6 and above include DC chokes and traditional electrolytic capacitors.

Optidrive Eco Pump product range complies with the requirements of EN61000-3-12.

#### **Optidrive Eco Pump delivers**

- Improved Efficiency, Reduced Lifetime Costs: e.g. for a 37kW load, operating 10 hours per day, 5 days per week, 50 weeks per year, improving the efficiency by just 1% will provide an energy saving > 100kWh per year
- Improved True Power Factor No additional charges etc.
- Lower Mains Supply Current

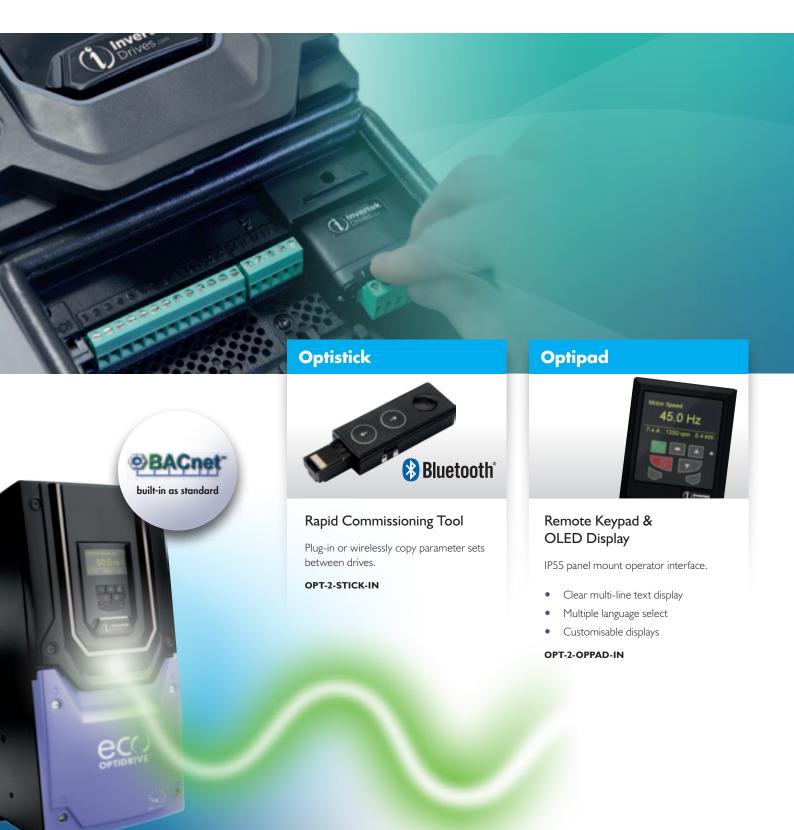

#### Typical efficiency comparison for Optidrive Eco Pump vs other AC variable speed drives

# Options & Accessories

Peripherals to help integrate Optidrive Eco Pump with your pumping systems

## Energy efficient pumping with **OPTIFL** W

# Powerful PC Software

Drive commissioning and parameter backup

- Real-time parameter editing
- Drive network communication
- Parameter upload, download and storage
- Simple PLC function programming
- Real-time scope function and data logging

Real-time data monitoring

Compatible with Windows XP, Windows Vista & Windows 7

### Fieldbus Interfaces

**BACnet/IP** OPT-2-BNTIP-IN

**PROFIBUS DP OPT-2-PROFB-IN** 

**DeviceNet OPT-2-DEVNT-IN** 

EtherNet/IP

**Modbus TCP** OPT-2-MODIP-IN

**Modbus** TCP

**PROFINET** OPT-2-PFNET-IN

**EtherCAT** 

## **Plug-in Options**

### Extended I/O OPT-2-EXTIO-IN

- Additional 3 Digital Inputs
- Additional Relay Output

Cascade Control OPT-2-CASCD-IN

Additional 3 Relay Outputs

### **Mains Isolator**

### Mains Isolator Option

Frame Sizes 2 & 3 can be factory ordered with a built in lockable isolator. An optional bolt on isolator is available for Frame Sizes 4 & 5

**Product Codes:** 

Frame Size 4 = OPT-2-ISOL4-IN Frame Size 5 = OPT-2-ISOL5-IN

**BACnet & Modbus RTU** on board as standard

# **Drive Specification**

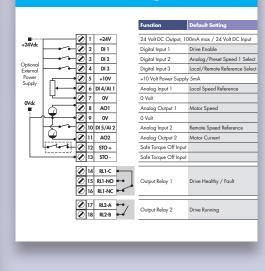

Input Rat				
	ings	Supply Voltage	200 – 240V : 380 – 480V : 500 – 600V :	± 10%
		Supply Frequency	48 – 62Hz	
		Displacement Power Factor	> 0.98	
		Phase Imbalance	3% Maximum	allowed
		Inrush Current	< rated currer	nt
		Power Cycles	120 per hour	maximum, evenly spaced
Output Ratings		Output Power	230V 3Ph. In 400V 3Ph. In 460V 3Ph. In	put: 0.75–2.2kW (1–3HP) put: 0.75–75kW (1–100HP) put: 0.75–250kW put: 1–350HP put: 0.75–110kW (1–120HP)
		Overload Capacity	110% for 60	seconds
		Output Frequency	0 – 120Hz, 0	1.1Hz resolution
		Typical Efficiency	> 98%	
Ambient Conditio	ns	Temperature	Storage: -40 Operating: -	
		Altitude	Up to 1000m Up to 2000m Up to 4000m	ASL without derating maximum UL approved maximum (non UL)
		Humidity	95% Max, no	n condensing
		Vibration	Conforms to II Sinusoidal Vik 10 – 57Hz @ 57 – 150Hz	EC 60068-2-6 oration 0.075mm Pk @ 1g Pk
Enclosure	в	Ingress Protection	IP20, IP55, IP	66
Program	ming	Keypad	Built-in keypad Optional remo	d as standard ote mountable keypad
		Display	Built-in multi la 7 Segment LE	inguage OLED (IP55 & IP66) D (IP20)
		PC	OptiTools Stu	dio
